

ALBERT NADAR *Senior Analytics Engineer (Business Intelligence & Product Analytics)*

✉ albertnsql@gmail.com ☎ +91-8097727994 in albertn97 🌐 albertnsql 📍 India

📄 SUMMARY

Senior Analytics Engineer with **7+ years** across analytics engineering, product analytics, and BI. Core stack: **Looker (LookML), Snowflake, dbt, Airflow, SQL, Python**. At National Pen, built the **semantic layer, governed KPI models, and self-service reporting infrastructure** that cut the team's dependency on ad-hoc SQL requests. I care about building things that last and that other people can actually use without needing me in the room.

★ CORE SKILLS

- **Analytics & BI:** Looker (LookML, Explores, Views, PDTs, Dashboards), Tableau, SSRS, KPI Design & Reporting
- **Data Modeling & Warehousing:** dbt (Models, Tests, Documentation), Airflow (dbt Orchestration), Star Schema, Data Modeling, Semantic Layer Development
- **Programming:** SQL (Advanced Analytics, Window Functions, CTEs), Python (Pandas, Scikit-learn, XGBoost), PowerShell
- **ETL & Platforms:** ELT/ETL Pipelines, SSIS, Data Warehousing, Data Quality Checks, AWS, GitHub Actions (CI/CD), GitHub, Bitbucket
- **Databases:** Snowflake, Oracle, SQL Server

📁 EXPERIENCE

Senior Business Intelligence Engineer / Analytics Engineer 12/2020 – Present | Mumbai, India
National Pen Inc (Cimpress) 📧

- **Customer Lifetime Value (LTV) Analytics:** Built a Looker model to calculate and visualize LTV across 1M+ customers. Analyzed purchase history, behavior patterns, and churn rates, driving a **15% increase in retention**.
- Designed and maintained a **governed semantic layer in Looker** that **standardized KPI definitions across teams**, eliminating metric discrepancies between Finance and Marketing reporting.
- **Predictive Modeling:** Implemented predictive analytics to forecast future LTV, identifying high-value customer segments and delivering **20% higher campaign ROI**.
- **Financial & Executive Reporting:** Developed and deployed 50+ reports (P&L, cash flow, budget vs actuals) with **10% YoY revenue growth insights**, improving financial forecasting accuracy.
- **Product & Customer Analytics:** Designed 10+ Looker dashboards and **30+ Explores/Views**, tracking product lifecycles, adoption rates, and customer feedback. Improved demand forecasting accuracy by **35%**.
- **Cross-Functional Collaboration:** Partnered with Finance, Product, and Marketing stakeholders to gather requirements and translate business needs into LookML models and dbt transformations, significantly reducing ad-hoc request turnaround.
- **Data-Driven Culture Enablement:** Led Looker training workshops and created documentation/playbooks that increased **self-service analytics adoption by 40%** across business teams.
- **ETL & dbt Analytics Warehouse:** Engineered workflows from **10+ sources** into Snowflake and built a dbt transformation layer with **staging, intermediate, and mart models** enabling Finance, Product, and Marketing teams to access consistent, tested datasets with **full lineage visibility**.

Data Engineer | SQL DBA 06/2017 – 11/2020 | Mumbai, India
mLogica

- **Architected and automated** a self-monitoring tool using PowerShell to track performance issues across **200+ SQL Servers**, reducing manual monitoring efforts by **60%**.
- **Optimized query performance** across **200+ SQL Servers**, accelerating slow-running queries by **50%** and improving reporting efficiency.
- **Revamped legacy SQL scripts**, reducing execution time by **20%** and enabling faster delivery of analytics for stakeholders.

🎓 EDUCATION

Master of Science in Information Technology 06/2019 – 06/2021 | Mumbai, India
Mumbai University

📜 CERTIFICATES

Google Business Intelligence Certificate
Microsoft Certified: Azure Database Administrator Associate
